Introduction

WHO ARE WE?

Since our inception in 2008, we have become one of the country's leading suppliers of innovative energy saving solutions, specializing in Air to Water Heat Pumps, taking hot water generation to another level.

WE ARE INNOVATIVE, INTELLIGENT, RESPONSIBLE, PROFESSIONAL, EXCELLENT AND ETHICAL.

WHAT DO WE DO?

Our technologically advanced systems are designed to be gentle on the environment and provide substantial financial and energy savings. We stay abreast of the latest innovations and have links to technology providers. We can offer turnkey solutions to achieve the most sustainable outcomes according to client needs. All our systems can be tailor made to individual specifications. Our nationwide infrastructure allows us to offer fast, reliable installation and maintenance anywhere in the country. Other advantages are, guaranteed savings, extended warranties and expert advice.

OUR MISSION

As a dynamic supplier of innovative energy-saving solutions, ThermoWise maximizes profits by reducing energy along with a firm commitment to reducing our carbon footprint. Through service excellence, technical expertise and long-term relationships built on trust, we help our customers make wiser energy choices that save them money and are kinder to the environment. Together with our staff, partners, clients and suppliers, we aim to reduce the human carbon footprint, convinced that intelligent solutions can make a big difference.

Product Range

HEAT PUMPS

By replacing conventional heaters, such as geysers, boilers and electric water heaters, ThermoWise Air to Water Heat Pumps provide you with higher energy efficiency and savings on your monthly electricity bills.

- Domestic Range 55°C Units
- Commercial Range 65°C Units
- High Temperature Range 85°C Units
- Constant Temperature Range 65°C Units

STORAGE VESSELS

- Pressure and Non-Pressure Vessels
- Hot and Cold Water Pressure Vessels

ThermoWise supply a wide range of pressure and non-pressure, also custom to customer requirement storage vessels for commercial and industrial use, some with up to 10,000 litres volumetric capacity. ThermoWise offers a fully comprehensive design service on all our tanks, allowing flexibility and ensuring exact specification as per customer's request. With our skilled production team, technical advice is available and we can respond to requests from contractors and engineers quickly and competitively.

THERMAL STORAGE VESSELS

ThermoWise Thermal Storage Vessels is simply an efficient body to accumulate & store energy in the form of heat or cold. The ThermoWise Thermal Storage Vessel has been designed as an in-direct high performance heat exchange tank, storing energy for later use. Pressurized potable water will flow through the pre-installed stainless steel coil(s) for instantaneous heating. This way we are able to optimize stratification within the tank and prevent mixing of the hot water and cold water.

LAGGING AND CLADDING

ThermoWise Lagging and Cladding Contributes to lifelong savings by reducing heat loss through the geyser & associated piping due to the inherent thermal insulation properties.

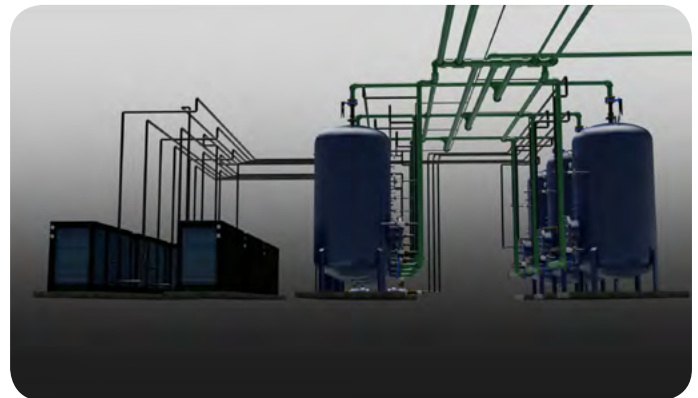

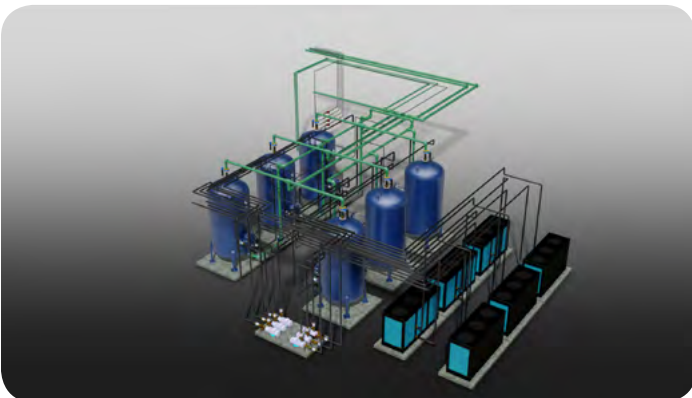

Product Range

PUMPS

ThermoWise offers high-quality efficient pump solutions for all purposes whether the application is for a domestic or commercial or hot or cold water installation.

TURNKEY PROJECTS

Water in water out is our business. Our project teams has the experience, capability and well established procedures and processes to successfully plan, initiate, execute and close-out multi-disciplinary projects with design, supply and installation of all Hot and Cold water applications from costing, risk management, fabrication/construction phase, projects management, performance reporting to hand-over and commissioning in various industries, offering excellent after sales service and maintenance, adding value to our customers' day to day

SERVICE, MAINTENANCE & REPAIRS

- Warranties
- Free on-site consultation
- In-house drawing office
- Installation and maintenance
- Payment terms and financing

Plumbing and Drainage

Forming part of our turnkey services, our contracting staff has a wealth of experience in all forms of commercial and industrial plumbing installations.

We offer supply and installation of multi-disciplinary plumbing & drainage systems, in applications such as Hospital, Hotels, multi-storey office complexes and multi-storey housing developments:

- Sanitary ware and fittings
- Internal plumbing & drainage
- External plumbing & drainage
- Rainwater disposal
- Subsoil drainage
- Fire water reticulation
- Hot water reticulation
- Cold water reticulation
- Bulk water storage tanks
- Booster pump systems
